To:

Aurora Electrical Services Pty Ltd

Brendan, Ben and the rest of the team at Aurora Electrical Services undertook the electrical installation and commissioning of our Day Surgery Hospital in early 2009. This was a very complex project with a tight six month timetable and strict Department of Health electrical standards.

The job was completed extremely efficiently and on time. The consulting electrical engineers and the Department of Health inspection team were very complimentary about the standard of the electrical installation and no faults were identified.

It was always a pleasure dealing with the team at Aurora Electrical Services who have proven to be very responsive to any enquiries and have continued to provide excellent ongoing maintenance services to our facility. I highly recommend their workmanship and customer service.

Kind regards
