Re: Testimonial – Aurora Electrical Services Pty Ltd

To whom it may concern,

This letter serves as a testimonial for Aurora Electrical Services Pty Ltd in support of their technical expertise and business acumen as electrical subcontractors.

Classic Contractors have engaged the services of Aurora Electrical Services for the past two years. Aurora has been one of our main electrical subcontractors for our commercial building projects. One of these projects was a new chiropractic center, which included 13 patient treatment rooms and a specialized X-Ray room. This project also required a major power upgrade to the site. Other projects include, fit out of existing and new offices.

The Aurora team has always been very thorough and efficient in the administration, management of the projects and with their personnel on site. The quality of work and accuracy has always been paramount. They have always been available for advice on specialized requirements applicable to the complexity of each project.

I have always found Aurora Electrical Services to be professional and courteous and always willing to work through problems and situations together to find a solution.

I have no hesitation in recommending Aurora Electrical Services, for their competency as subcontractor and their integrity in business and in person.

Yours sincerely,

LEE KLOMP
CONSTRUCTION MANAGER
